

ABSTRACT OF THE DISCLOSURE

AUTOMATIC STOCK SELL/STOP MONITOR PROCESS

A new and improved process for monitoring and modifying a security such that a
5 security owner may have an order price automatically updated without an need for human
input. The process includes the steps of includes the steps of providing an associated
security having an associated purchase price, setting a sell/stop price, setting variable
points, setting a time interval, updating an associated last sale price of the associated
10 security after every time interval, adding the variable points to the associated purchase
price, the addition rendering a result, subtracting the result from the associated last sale
price, the subtraction rendering an adjustment factor, and creating a new sell/stop price if
the adjustment factor is greater than zero by subtracting the adjustment factor from the
associated last sale price.
